Amdt. dated August 5, 2005  
Reply to Office Action of June 9, 2005

#### REMARKS

The specification and drawing have been amended to secure correspondence with one another.

Claims 1, 11, 16-17, 19-20 have been amended for puposes of clarity and thus for reasons unrelated to patentability.

The objection to Claim 1 should be withdrawn.

The Examiner states:

Claim 1 is objected to because of the following reasons.

In claim 1, lines 9 and 10, "the third surface of **the semiconductor die** is coplanar with the active surface of the semiconductor die" is incorrect. Appropriate correction is required. (Emphasis in original.)

Claim 1 has been amended and now recites:

A semiconductor package comprising:  
a semiconductor die comprising an active surface with bond pads thereon, an opposite inactive surface, and four peripheral side surfaces extending between the active and inactive surfaces;  
a substrate comprising a first surface, a second surface opposite and parallel to the first surface, a third surface extending between the first and second surfaces, and conductive circuit patterns at the second and third surfaces,  
wherein the first surface of the substrate is coupled to only a first one of the four peripheral side surfaces of the semiconductor die, **the third surface of the substrate is coplanar with the active surface of the semiconductor die**, and the bond pads of the semiconductor die are electrically coupled to the conductive circuit patterns of the third surface of the substrate; and  
external interconnects electrically coupled to the circuit patterns of the second surface of the substrate, whereby at least some of the external interconnects are electrically coupled to the semiconductor die. (Emphasis added.)
